GLADIOLUS

Gladiolus Cultural Directions

A plot which will produce good vegetables will produce good gladiolus spikes. Select a planting plot as far from trees or buildings as possible. Tree roots rob the ground of moisture and buildings reflect heat.

BE SURE TO DISINFECT THE BULBS BEFORE PLANTING to destroy thrip and to kill certain disease germs. **THRIP** are tiny insects, which damage the flower spike even before it emerges from the plant, they live over winter on the bulbs, unless they are dusted with DDT while in storage over winter.

TO DISINFECT THE BULBS USE ONE OF THE FOLLOWING DIPS:

LYSOL DIP — 4 teaspoonsfull of Lysol dissolved in 1 gallon of water. Soak bulbs in this solution 3 hours. Plant while still wet, in moist ground.

NEW IMPROVED CERESAN OR CERESAN M- DIP — 1 ounce Ceresan, 1 tablespoonfull of Dreft dissolved in 3 gallons of water. Soak bulbs 15 minutes and plant while still wet, in moist ground. This is a powerful dip and must be handled carefully.

To keep the separate lots separate while dipping, place each separate lot in cloth bag, labeling each bag.

PREPARE YOUR GLAD BED WELL by spading deep and adding plenty decayed cow manure if you can get it, otherwise use a commercial fertilizer, such as VIGORO. Plant bulbs 5 to 6 inches deep. Space them 6 inches apart in the row.

Since all people do not kill thrip at planting time, there is danger of getting thrip from other gardens because thrip can fly and are also carried by the wind, so when your glads are about 6 inches high start spraying or dusting to prevent thrip injury.

Make a spray solution by dissolving 1 ounce of 50% wettable DDT in 3 gallons of water. If you prefer dusting use 5% DDT in a small dust gun. **SPRAY OR DUST EVERY 10 DAYS** up to blooming time.

WATER

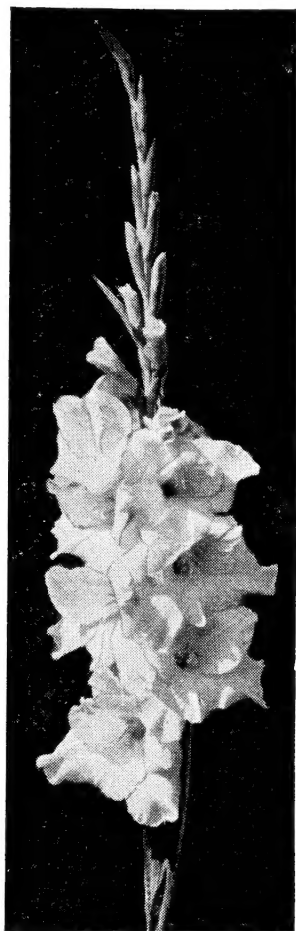

Don't expect to grow tall glads with long flower heads unless you give them plenty water. After the flower spikes start emerging, give them a good deep soaking once a week. A light sprinkling actually harms them, as it draws the roots to the hot surface.

Glads are primarily cutflowers. Cut the spike when the first flower opens and develop them indoors. They will open in water, and you can enjoy them indoors a long time. When cutting the spikes leave at least 4 leaves on the plant to develop the bulb for next year.

October is the usual bulb digging month. Lift the bulbs with a spade. Cut the stem off close to the bulb. Dry them in shallow boxes or trays until dry enough to remove the old bulb and roots, then dust the cleaned bulbs with 5% DDT and store in cloth bags, screen bottom trays or shallow boxes in coolest place you have but they dare not freeze.

ALL THESE DIPS, SPRAYS and DUSTING MATERIALS ARE POISON!

1951 Introductions

CO-ED

deeper blended blotch. Plants are tall, never crook and floret placement and attachment are perfect. Our only criticism is it lacks 3 or 4 buds on the flower head. However as a glad expert said "It's the flower we love, not the buds". Has thrilled us and visitors regularly during its 9 year test period. Blooms late midseason. Pictured on front cover.

Mona Lisa 516 (Lins 1951)

Parentage—California X Peggy Lou

Purity and serenity are personified in Mona Lisa. The color of its 5¾ inch wide open well attached florets is pure unmarked creamy buff. Those who can appreciate the delicate tints will love Mona Lisa. Plants are medium tall with good flower heads. Midseason bloomer and a good propagator. N. A. G. C. Trial, Purdue—92 Points. Comments: "A Very Good Seedling."

Co-ed 542 (Lins 1951)

Parentage—(Rio Rita X Orange Prince) X Euides

Co-ed is a gorgeous rich pure pink about the shade of Tivoli. The large luscious florets are slightly ruffled and waved. The plants are tall with long stretchy flower heads of 20 or more buds.

Bulb production is excellent. Has all the earmarks of a good commercial. Due to easy propagation we have enough stock to allow a low introductory price. N. A. G. C. Trial, Illinois—Score 90 Points. Comments: "Very Good Clean Pink."

Marvelous 443 (Lins 1951)

Parentage—Picardy X (Aflame X Pfitzer's Triumph)

A rather presumptuous name however we believe you will agree its beauty deserves it.

The deep shell pink florets are of such heavy substance and so extremely ruffled they seem carved out of a shell. Interest and beauty are enhanced by a

WHITE TOWER

White Tower 501 (Lins 1951)

Parentage—June Bride X Margaret Beaton

Sensational, tall, stately White Tower is a welcome addition to the list of blotched whites. Few glads equal its height and vigor. The florets are PURE WHITE with a deep pink blotch. Attachment, placement, substance and texture are perfect and best of all it is an early bloomer.

CORAL GABLES

Coral Gables (441) Lins 1948

At its best as beautiful as a Prima Donna and as sentimental. When it likes its growing conditions it will produce a breathtaking tall spike with 10 gorgeous, large wide open, beautifully formed and gorgeously tinted florets. The color is a bright sparkling light pink with a harmonizing throat blotch. All in all a very beautiful floret. Some of these beautiful florets are double. A variety for the connoisseur.

Blondie (306) Lins 1948

This seedling of New Era X Maid of Orleans outdid itself as a good cutflower for us last season. We had enough stock to give it a workout in our cutflower fields. We cut longheaded tall spikes from even No. 4 size bulbs. Produces a ribbon of ruffled, well attached cream florets with many buds in color. Not a large flower but much more beautiful and useful than some big floppy varieties. It is an easy grower and propagator. Midseason. We suggest cutflower growers try our \$5.00 trial set—you can't lose much and you might find, in Blondie, just what you are looking for in a ruffled cream.

BLONDIE SPECIAL—

5L; 10M; 25S and 100 Bts. for \$5.00

Silver Court (400) Lins 1948

With the advent of Silver Court a new era of pure white gladiolus was inaugurated. When compared with the known "White" Picardy sports they seem cream. For certain floral makeup work, especially for weddings, discriminating florists demand pure white, not cream white flowers, Silver Court supplies this demand.

Some growers report 5½ inch and up, florets, which would place this in the 500 class. You will find few poorly placed spikes, which is important. It is a good propagator and of course the fact that it blooms early adds to its desirability.

This year we can supply planting stock and bulblets at wholesale.

Scored N. A. G. C., Purdue, 90; Illinois, 88.

Jingles (230) Lins 1949

Small, waxy, heavily ruffled florets of a rich clean coral salmon shade. A cute little number that has made a hit.

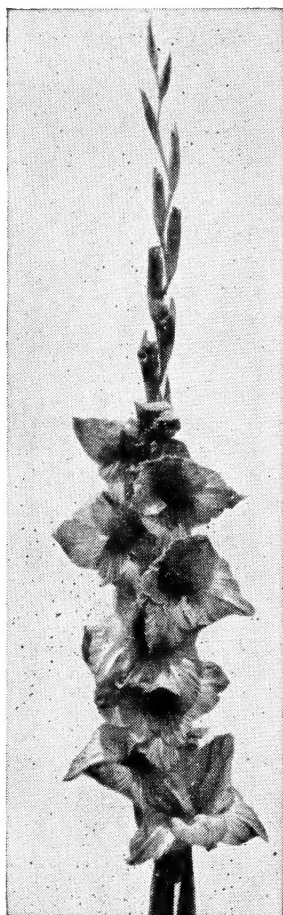

Large or Medium 40c

10 Bts. for 40c

Unpredictable (462) Lins 1949

Although all its florets seem double at a distance, some plants actually produce florets with eight or more petals. We are not stressing the doubling tendency, rather its round Hollyhock like florets of rose pink, bordered in white. The plants are not tall and the florets are around 4 inches across but for make up work or bouquets they really have something.

4 for \$1.00

VOGUE

Vogue (466) Lins 1949

The color of this heavily ruffled King Lear X Myrna seedling is deep mauve lavender, an unusual color. Florists tell us Vogue can be used where either deep lavender or rose color is required.

Mrs. Ward of Ward's Flower Ranch says "by all means call it a mauve Burma." The picture with 8 open shown herewith is of a spike Mr. Merle Allen, Owatonna, Minn. entered in the color class. The 3d and 4th floret were out of correct position otherwise it would have been Section Champ. Another Vogue of his was entered in "Most Beautiful Class" where it received the second highest number of votes in a crowded class, without any "Vote Round Up Campaign".

From experience we know that as soon as stock is available, florists will take all the cut Vogue we call supply, even in a glutted market because there are few glads in this shade.

Vogue is a good propagator. One customer reports 578 bulblets from 4 bulbs.

Dixie Belle (222) Lins

Small brilliant ruffled orange. Sparkling and brilliant.

5 for 50c

Black Knight (454) Lins 1949

The happy union of Black Panther and Vagabond Prince produced this reliable easy growing dark brown red. The longer we grow Black Knight the better we like it. Its tall straight spikes with long flower heads, its perfectly formed well attached and perfectly placed florets, its unusual shade of deep brown red, plus good bulblet production and other good qualities are bound to make friends. Color does not fade in the sun.

If you like dark shades we suggest Black Knight.

Rated (A) (Superior), Illinois, N. A. G. C. Trials; 86 points at Purdue.

Dream Castle (340) Lins

When Richard Deiner introduced W. H. Phipps, it thrilled the glad world because it opened practically the whole flower head before the lower florets wilted. W. H. Phipps was used extensively in breeding and present day varieties, able to open and hold in good conditon, practically the whole flower head, owe this characteristic to the influence of W. H. Phipps.

DREAM CASTLE

spikes, its ability to produce good spikes from even small bulbs, place it in a very special class.

Dream Castle is a descendent of W. H. Phipps. It has inherited the characteristic of opening a full flower head from its illustrious ancestor. Mother nature added ruffling, always perfect floral placement and non crooking spikes.

As seedling it was rated 92 points with 8 open. The last day of the show it had 11 open.

Tall spikes with 12-13 open florets in good condition are nothing unusual. It produces good spikes from even small bulbs.

Saturday, Aug. 26th, 1950, our exhibit at the Minnesota State Fair contained a large basket of Dream Castle. Most of the spikes had about 6 open. On Tuesday, Aug. 29th, practically all glads entered on Aug. 26th had deteriorated and had been thrown out, however our basket of Dream Castle was still in perfect condition, in fact was even more sensational than on Saturday, Aug. 26th. The Dream Castle spikes in that basket had opened up practically all their florets and the lower florets were still in perfect condition. Although we had brought fresh cut spikes of Dream Castle to build a new basket, it was not necessary, as we could not have improved on the first one.

Unfortunately we introduced Dream Castle before we had sufficient stock with the result that up to this year we could not offer it in quantity. Cutflower growers wanted it but we could not supply in quantity. We now have enough stock to supply it in fair quantity.. (See wholesale list). Those who are not growing this are invited to help themselves to this outstanding exhibition and cutflower variety.

In its class Dream Castle has little competiton on the show table. Its warm pure coral pink ruffled florets, always perfectly placed and well attached, on long 20 bud

Hi Hat (430) Lins

Late blooming orange pink that can make thrilling spikes. Given conditions to its liking will produce tall plants with long flower heads with practically the whole flower head in bloom or buds showing color.

Large	3 for 25c — 10 for 70c
Medium	5 for 25c — 10 for 45c

Royal Robes (354) Lins 1947

Velvety, ruffled, rich deep red Royal Robes has many admirers among those who appreciate the smaller flowers. Its florets are not large nor are the plants tall, nevertheless whenever it is offered in our retail drive-in flower shop, customers buy it eagerly. The rich deep color of the ruffled carved florets is hard to resist.

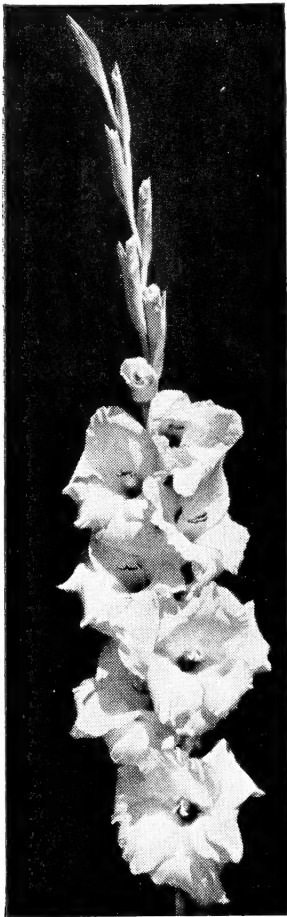

A bowl, or vase of rich red Royal Robes, with small white or yellow flowers is stunning.

It is a pleasure to harvest Royal Robes bulbs, they are loaded with large bulb-lets which grow about 100% into plump healthy bulbs. Used as a seed or pollen parent it has produced beautiful seedlings ranging in shades from brilliant scarlet, thru red, violet purple, red purple, pansy purple to black red, all nicely ruffled.

Here again, demand proves flowers do not need great size to be popular.

TREASURE ISLAND

Treasure Island (540) Lins 1947

Giant ruffled beautifully formed, warm light rosy orchid pink Treasure Island combines size with perfection of form and high color value. Rosa Van Lima one of its parents, was and still is, one of the best cutflowers. Treasure Island, besides being as dependable as Rosa Van Lima is much more beautiful and refined in spite of its large florets and vigorous growth.

We are now growing this in quantity for cut-flowers. It is a pleasure to walk down the rows and cut spike after spike of perfect flowers because nearly all the spikes are No. 1 grade. To make a long story short, this is about as reliable and perfect a light pink as can be found. Cut flower growers not yet growing Treasure Island are invited to give it a trial. We are sure they will stock it heavily for cutflowers. Blooms early mid-season and it is a good propagator. N. A. G. C. Trials, Illinois, Rated it (A) (Superior).

TROCADERO

Trocadero (422) Lins 1946

To grow brilliant yet soft, pure unmarked Trocadero is an adventure in glad growing. It is not a harsh gaudy orange but a beautiful clean mild shade. We know of no other variety of this shade and suede finish.

Plants are extremely tall with long flower heads. You don't have to cut it low to get No. 1 grade spikes. Leading growers endorse it. In a recent report from the University of Florida's trial ground, covering hundreds of leading varieties, we note, quote: "If you need an orange, grow Trocadero." If you are not growing this you owe it to yourself to get a start now.

Spellbound (442) Lins 1947

This seedling of (Picardy X Com. Koehl) X New Era is a pure non flecking medium rosy pink blending to a small snow white heart. The medium height, always straight plants produce fine flower heads with 8-10, well attached and always perfectly placed florets.

We grow this beautiful pink in quantity for our retail flower shop. There is just as definite a place for the medium height varieties as there is a definite place for the tall varieties. For large baskets a tall spike is needed but for home vases what are you going to do with cut glads as tall as hybrid corn. Our retail experience has shown people prefer the medium spikes with beautiful florets for home use. After all its the flower you love, not the long stem.

L 50c; M 30c; S 10c; Bts. 10 for 40c; 100 for \$3.00
- WHITE SATIN** (100) (Koerner) Small 1 to 2 inch, creamy white, FACE UP florets on thin stems. In demand for bridal bouquets and make up work.
Bulbs 2 for 25c; 10 for 80c
- WHITE STAR** (400) (Marek) Large white with lower petals ivory, slightly ruffled. 24 inch flower heads of 16 to 20 buds on 48 inch plants. Produces many bulb-lets which germinate easily. The important feature is its 100% production of perfect spikes. Opens well in water when cut in bud.
L \$2.00; M \$1.50; S \$1.00; Bts. 10 for \$2.00

Wholesale Prices (Not Prepaid)

25 bulbs of a size and kind at the 100 rate, 250 at the 1000 rate. A pint of bulblets may be had at one-half of the quart rate unless otherwise stated. All quotations are subject to prior sale. We ask 25% down payment with order and the balance before shipping order. All wholesale shipments F.O.B. Cologne, Minnesota. Each bulb shipped, regardless of size, is hand selected, assuring you uniform, disease-free quality bulbs.

If an order is part wholesale and part retail we will ship the order F.O.B. and include enough extra bulbs to cover the shipping charges on the retail part of the order.

TREASURE CHEST COLLECTION

This unlabeled collection in many different shades and colors is a real bargain. If the varieties, in this collection, were bought under name, they would cost many times more. We can make this bargain price because we grow our own bulbs. This collection varies from year to year. New varieties, some obtainable only from us, are added each year. **WE HAVE ONLY ONE UNLABELED COLLECTION.** Surplus bulbs of varieties costing \$1.00 and more per bulb at retail go into it, no wonder the Treasure Chest Collection is so popular. We sell many of these collections each year and get repeat orders every year from well pleased customers.

100 MEDIUM BULBS PREPAID U.S.A. .. \$3.00

100 LARGE BULBS PREPAID U.S.A. \$4.25

The Pacific Strain of Delphinium Hybrids

This strain is recognized as the best in Delphinium today. They are not offered in named varieties but rather in named series. Perfect specimens of each series are interbred until the resultant seedlings produce a large percentage of specimens, true to description of that series. Inasmuch as only those specimens, which embody all the best qualities, are used in breeding, each succeeding generation is better than the previous generation.

The plants we offer for 1951 are large 1 year old, field grown plants, grown from hand pollenized seed procured direct from the originator and should not be confused with small pot grown seedlings, offered at lower prices. Most of these have already bloomed and we were amazed at the large flowers these young plants produced. The plants we offer should produce specimen flower spikes this summer.

GALAHAD SERIES—The greatest achievement in giant whites. The clear white flowers with white bees are often 3 inches across.

LANCELOT SERIES—Clear lilac self with white bee. A rare color in Delphinium and one of the most beautiful.

GUINEVERE SERIES—Clear pink-lavender self with white bee and very large flowers.

CAMELIARD SERIES—Clear lavender self with white bee. Flowers are very large and of perfect form.

KING ARTHUR SERIES—Rich velvet royal purple with white bees.

BLACK KNIGHT SERIES—Darkest violet with black bees. Beautifully formed 2 to 3 inch flowers.

SUMMER SKIES—Light heavenly blue with white bees, representing the fleecy clouds. A color long sought in large hybrid Delphinium.

BLUE BIRD SERIES—A true blue Delphinium has been the hardest to produce. This series sets a new high standard in blues of today.

Your Choice Of Varieties

8 One-year-old, Field Grown Plants for **\$3.50**

4 One-year-old, Field Grown Plants for **\$2.00**

Shipped in early spring — Prepaid in the U. S. A.

Lins Peonies

Lins originations are found in most distinguished peony collections and now that we had favorable increase on some of our varieties, we are offering these at reduced prepaid prices.

BURMA—Large beautifully formed brilliant deep red double. Fine plants with strong stems, holding the bloom perfectly erect. When first shown in 1945 it was **CHAMPION RED** as well as first in 1 bloom and 10 bloom classes. Has had other top awards since then and was **CHAMPION RED** in 1950. Burma bloom from established plants are hard to beat on the show table. Blooms midseason.

\$15.00

CASABLANCA—Full double pure white of extraordinary size and beauty. Stems are very strong and hold the giant bloom perfectly erect. Buds as large as door knobs, develop into thrilling bloom. An adventure in peony growing. Strong medium healthy plants, foliage way down. Late midseason.

\$15.00

DOLORODELL—In 1943 we entered 3 blooms each of Casablanca, Ramona Lins and Dolorodell in competition for the American Home Achievement Medal. We were told each of these varieties was good enough for the award. The medal was awarded to **DOLORODELL** on account of its rich pink color. Dolorodell has very large beautifully formed full double rich pink bloom on strong stems which hold the great bloom perfectly erect. Foliage way down. Blooms late midseason. An outstanding peony which peony lovers will be proud to show.

\$20.00

ENSIGN MORIARTY—Very large full double heavy bloom on very strong stems which hold the great bloom erect. Color is medium dark pink blending lighter pink on petal edges. Fine garden plant and a great exhibition flower. Has won **CHAMPION** ribbon in dark pink class. Blooms late midseason and is good every year.

\$15.00

GARDENIA—Although shown first time in 1949, peony experts have already given it their approval. The perfect plants with strong stems, which hold the large bloom perfectly erect, are loaded each year with very large, double, beautifully formed Gardenia like bloom. The form, texture and substance of the bloom suggested its name. Cut in bud the bloom is flesh and when allowed to bloom on the plant the bloom is a beautiful giant Gardenia formed white. It won the **CHAMPION** ribbon in flesh class in 1950. Good garden and show variety. You can win with Gardenia. Blooms midseason.

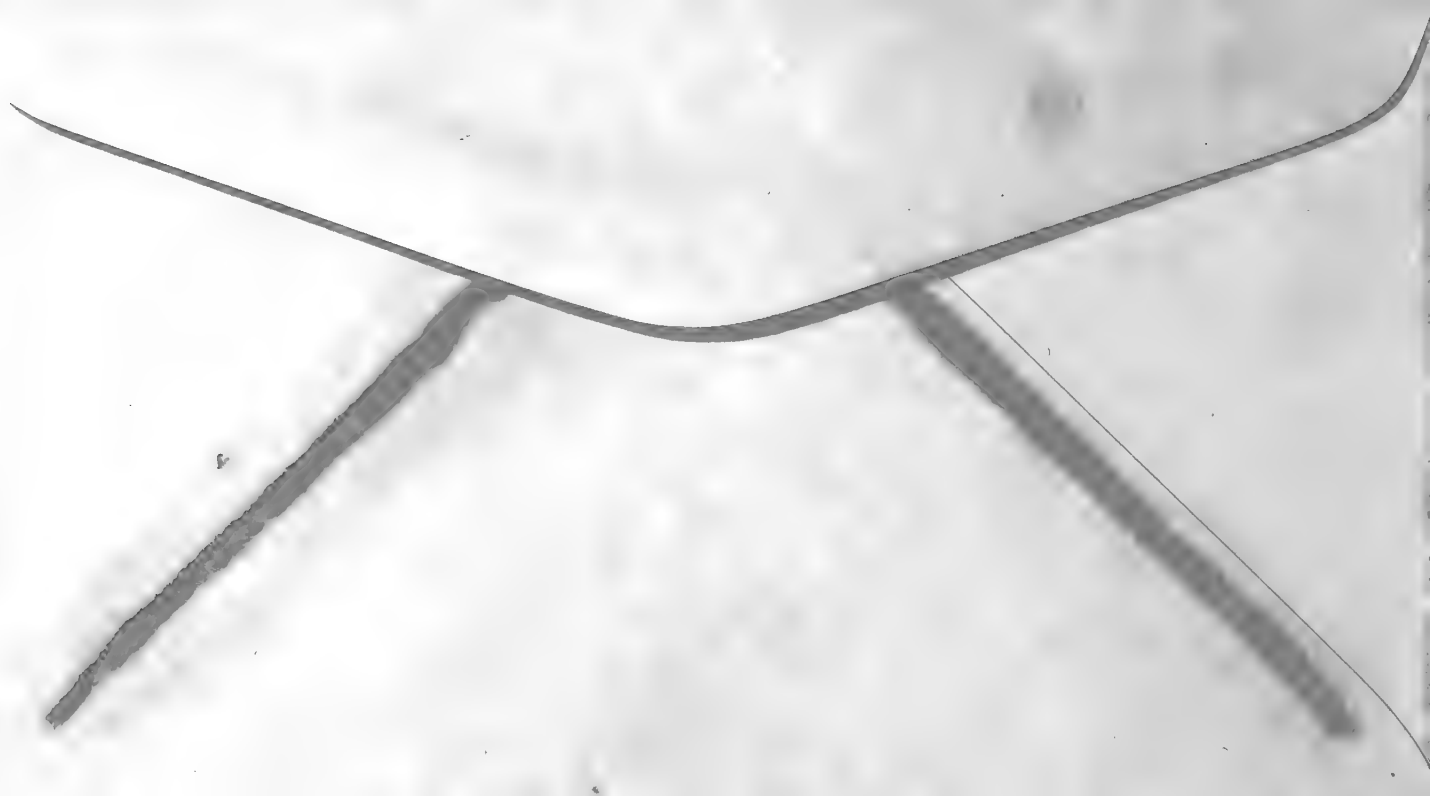

\$10.00

KING MIDAS—Full double brilliant pure red on excellent plants with strong stems which hold the bloom perfectly erect. The outstanding feature of King Midas is its beautiful rose form with perfect rose bud center, rarely found in red peonies. Was **CHAMPION RED** and has won the **ACHIEVEMENT MEDAL** as well as other top awards. A first class garden and exhibition red. Cut in bud, stored dry, opens into perfect bloom.

OLD LACE—Tall plants with long willowy but adequate stems, each crowned with an 8 inch or larger, perfectly formed, full double flat bloom, composed of precisely arranged long narrow petals radiating from the center. The color is a beautifully ivory flesh. Blooms early midseason. An excellent garden plant and to me one of the most beautiful peonies.

\$5.00

TARAWA—Pure brilliant red, which in the first stages of bloom, looks like a Japanese type peony with red collar and a center of pure red lacinated petaloids. The red petaloids gradually develop into a large pure red bomb. Blooms early on fine strong plants. Excellent lawn and garden specimen.

\$5.00

TONDELEYO—As a seedling, Tondeleyo first came to the attention of the seedling committee of the American Peony Society, at the great national show at Rochester, Minn. in 1940, where practically all the dark pink varieties were represented. The committee compared Tondeleyo with other dark pinks at the show and officially recognized Tondeleyo for its deep pink color of unusual fire and brilliance. Due to its brilliant color it is immediately spotted across the show room. Plants are tall and its strong stems hold the large full double bloom perfectly erect. Midseason.

\$15.00

TULAGI—Beautiful red Japanese type. Tall sturdy perfect plants. Large brilliant red bloom composed of pure red collar with large cluster of refined deeper red petaloids, which never feather. A beautiful lawn or garden specimen plant. Midseason.

\$5.00

VALENCIA—Although it won the AMERICAN HOME ACHIEVEMENT MEDAL in 1941 we have not released any until now. Valencia is a brilliant double high crowned pure red but is not a bomb. Fine medium plants with stiff stems which hold the flowers erect. Blooms midseason. Peony experts have given it their approval. It is really red.

\$20.00

Special Collection Offer At Giant Savings

One Root of the Above 11 Varieties, a

\$132.50 Value for \$100.00

Canadian customers please ask for a parcel post import permit.

MINNEKADA—A new Japanese type peony whose color is hard to describe. Lilac-lavender blending to flame rose is an inadequate description of the very unusual color. Nicely formed flowers on medium height plants.

\$15.00

1951 Harris Introductions

SIERRA SNOW—

Huge glistening ruffled white with 5½ inch bloom. Grows 66 inches tall in the field with 30 inch flower heads. Opens 10 with 10 in color.

PEACH GLOW—

Large buffy orange, heavily ruffled. Opens up to 8 florets of heavy substance and texture. A prize winner.

Novelty Queen

THIS IS THE
DOUBLE DRAGON
WHICH HAS CAUSED A
SENSATIONAL AT THE
SHOWS LAST SUMMER.

Introducer's description: It is a large rose salmon with the regular six petals, however on the back of each petal it has spurs like the spurs on the Columbine, also has spurs or feather petals on the front, which, together with its ruffling and all, fill up the flower to resemble a Pom Pom Mum. The older the bulbs get of this the better they are. This year we are sending out only bulbs which have proven very nice. It sets seed, so should be valuable for breeding. If you want some thing "ENTIRELY DIFFERENT" this is it.
